TO THE OWNER

As a Teak World product owner, you deserve service unparalleled in the industry. The subsequent pages of this booklet will help you understand the terms and limitations of the warranties you receive as a Teak World product owner.

Your product is covered under the terms of these warranties and we will exchange or repair any defective parts in accordance with the terms of such warranties within stated limits.

Most important, we hope you get years of enjoyment from your product. Isn't that the best part of owning a Teak World product?

WARRANTY SERVICE: If you have any concern with your Teak World product that the warranty covers, contact the Teak World showroom where you made your purchase with a proof of purchase.

For your kind information, the main solution usually provided by Teak World under this warranty is to repair or replace the product or any part thereof, where such need arises, to the discretion of Teak World and subject to the terms and conditions of this Warranty.

If we decide to replace a product we no longer sell, we will replace it with a corresponding product of equal value which is of similar kind, age, and quality. If your product is repaired or replaced, the warranty will not be renewed or extended.

Teak wood products undergo natural expansion and contraction with time, resulting in small cracks or "checking". This is part of the natural aging process of the timber as it settles into its new environment. This does not affect the furniture structure or durability and is not a product fault.

GENERAL WARRANTY COVERAGE

This warranty is valid from the date of delivery to the first and original owner, and it applies under conditions of normal household use only.

Our products are not warranted against impact damage, normal wear and tear, indentions, scratches, and surface damage caused by accidents, abuse or neglect; against damage caused by pests and/or pets; against damage caused by natural disasters or any force majeure; and against damage resulting from improper use, care, or storage. The warranty does not apply to commercial use.

Our products, unless otherwise stated, are made for indoor and/or covered terrace use. Our products are not warranted against direct sun exposure and/or products located in the sun's path. Sun exposure and heat damage, your air conditioning system or a humid environment can all threaten the quality of your furniture and is ultimately unsightly and irreversible.

As many of our products are handcrafted and made with natural materials, variations in size, shape, grain, colour, and markings which develop over time due to natural processes can be expected. The present warranty does not cover such variations or any differences between floor samples or printed illustrations and your item(s). Teak World warranties do not cover products sold "as is".

Any product modification or unauthorized repairs by the consumer, or use of non-Teak World parts, will void this warranty. Improper or insufficient maintenance by the original purchaser will also void this warranty.

Teak World is also not responsible for colour variations in fabric or leather upholstery due to dye lot variations that may occur with non-concurrent orders. In no event and under no circumstances shall Teak World be liable for special, consequential, incidental, or other damages.

GOOD TO KNOW!

Our furniture are built out of high quality materials to tolerate and adjust to the fluctuations in temperature and humidity.

However, heat from the sun, your air conditioning system or a humid environment can all affect the function and aesthetic of wood. Don't store wood furniture in the basement, attic, garage, or a warehouse, if at all possible, as this will cause it to age more quickly.

With leather, too much sun and harsh lighting can lead to two things: colour fading and drying out. Too much heat or sunlight causes moisture in the leather's natural oils to slowly evaporate, resulting in stiffening and unsightly cracking.

Just like leather, fabric tends to fade if exposed to the sun and harsh interior lighting. If your fabric furniture is exposed for prolonged periods of time, the fabrics will start to fade. Dark colours will fade more rapidly.

If you have a beautifully sunny room, try to design the floorplan with flexibility in mind. Sofa and two chairs? Try rearranging the items so that the sofa's back is not always against the window, and vice versa. This will at least help the items fade consistently all over.

Lastly and most importantly, communicate with your sales consultant. The questions they ask about furniture location is not to be nosy, but to make sure that they are selling you the best product for your environment.

You love the furniture when you buy it; we want you to love and enjoy it for many years to come.
